

Chiller Contingency Plans for Critical Cooling Situations

Failure to plan is planning to fail

Star Refrigeration and Aggreko are working in partnership to offer a tailored contingency plan for your site, helping you think ahead for when the unthinkable might happen.

- Full site survey assessing plant capacity, plant location, tie-in points, pipework and electrical cable routes.
- Emergency call out procedure put in place to ensure rapid response time, typically 4-6 hours.
- One call to Star Refrigeration and your plan is put in place.
- Annual review to assess site for changes in layout, capacity, access, etc.
- Potential seamless transition to temporary cooling solution.
- Priority access to Aggreko fleet with an ability to reserve equipment so it is always on standby for your business.
- Potential reduction in insurance premium
- No issues associated with payment and equipment authorisation.
- Peace of mind.

Emergency situations can happen

What kind of impact would these have on your business?

- Plant Room fire or flood
- Control Panel fire or flood
- Major plant failure
- Heat exchanger failure
- Power failure
- Total loss of cooling

- Would a non-operational refrigeration plant cost your business a large amount of money through loss of product or loss of production?
- Would a tailored plan for your site which identified potential risks and how to mitigate these for having an impact on your business be of value?
- Would a bespoke contingency plan allow you to have peace of mind should a major failure occur?

Call us now to arrange a site visit to discuss your temperature control and power requirements.
